About SoundAI Technology

SoundAI is a multi-skilled AI cloud-brain company established in May 2016, which is focusing on multimodal far-field sensing and multi-skilled large language model named Azero, integrated with context-driven voice, image and language service available on smart healthcare, smart finance, smart city and smart life. We offer a collection of Azero built-in devices, skills and tools to make it easier to connect humans, machines and things. The typical application cases include smart digital platform for the 2022 Olympic and Paralympic Winter Games, smart healthcare kit for Covid-19, smart data system for Universal Studio Beijing and smart speakers for internet manufacturers. Now we are committing to helping more hospitals, pharmaceutical companies and regulatory agencies to achieve digital transformation and become more competitive. Our mission is "Making Things Smarter", and our vision is "Smarter AI, Better Life".

We rank first in the field of artificial intelligence perception layer innovation in China. But the most valuable achievement for SoundAI is that we are serving 10+ thousand well-known customers and partners, connecting 20+ million smart devices and protecting the health of 70+ million users. We have continuously improved medical efficiency and doctor-patient experience. We have four joint laboratories with famous universities, and the joint laboratory of acoustics and artificial intelligence cooperated with the Chinese Academy of Sciences has won Beijing Science and Technology Progress Award. We have initiated more than 100 national industry standards, and obtained more than 300 honors and more than 1,500 intellectual property rights.

We also are the outstanding AI enterprise fighting against Covid-19 commended by the Chinese government, the Chinese Specialized New Giant Enterprise, the Chinese High-tech and Double soft Technology Enterprise, the Frontier of Zhongguancun Technology and Zhongguancun High-tech Enterprises, Beijing Intellectual Property Pilot Units, Top 100 AI Intellectual Property Enterprises, Top 100 AI Enterprises, AI Best Employers Enterprises, and New 100 Million Midstream Enterprises, etc. And we are also member of the Chinese Computer Society, the Chinese Acoustic Society, China Association of Artificial Intelligence, China Electronic Audio Industry Association, China E-Commerce, China Artificial Intelligence Industry Development Alliance, China Smart Home Alliance and Zhongguancun Beijing Enterprise Cloud Ladder Technology Innovation Alliance, as well as ARM, NVIDIA, RISC-V, BOSCH, Baidu and other alliance committee units.
